KlangQ - Room 22 Cyriel Pluimakers

KlangQ presents the SWIX MTR 963 AlNiCo speakers: crossover-free monitors featuring an oval full-range driver for maximum phase coherence. Amplification is provided by the SWIX PRE IV preamplifier and two Class A valve monoblocks built around the 2A3 triode.

Digital playback comes courtesy of the SWIX VDT IV Valve Digital Transport and DAC V, featuring a classic Philips multibit DAC and an all-valve analogue output stage.

For vinyl, the PrimaryControl Kinea II is fitted with two tonearms: a magnetically stabilised unipivot and an Arrow precision tonearm. A Miyajima stereo MC cartridge and a dedicated mono MC cartridge for historical recordings complete the setup. The SWIX SUT II MC step-up transformer contributes to quiet, harmonious and dynamic signal transfer.

An impressive system with an exceptionally balanced sound, unlike any other setup at Dutch Audio Event 2026. A testament to the versatility of high-end audio, where unconventional solutions are given room to flourish.
