

Resurrecting the Soul of Music

PRE V

LINE PRE-AMPLIFIER

TUBE INSTALLATION GUIDE

Top View

POSITION	VALVE	TYPE	EQUIVALENT
V1	5U4	Octal	5U4 Family
V2	45	UX4	45 Family
V3	45	UX4	45 Family
V4	6J5	Octal	6J5 Family
V5	6J5	Octal	6J5 Family

WARNING: V5 is a valve rectifier responsible for the biasing of V2 & V3. Do not operate the amplifier without the V5 in place as this can cause serious damage to the amplifier. Only replace V5 for the same type of rectifier and check the bias before operation.

WARNING: Please ensure that the valves are correctly inserted into the socket. Incorrect orientation can cause significant damage to the unit. Please match the pins with the socket correctly.

Installation

- Do not insert/remove tubes while the device is **powered on**.
- Wear gloves to avoid unwanted marks on the tubes
- Insert the corresponding tube into the socket until they firmly sit inside.
- Certain tubes come with a location notch at their base that match the socket.
